FLAME WINDOW	P9000 - 22.3 sq in P12000 - 32 sq in
BLOWER FAN	Standard 12VDC .17amp
EXHAUST CAP	4.75" Tall

Model #00-NEW-P9000 / 00-NEW-P12000

Product Includes:

- Fire viewing window
- 12V Speed control
- Backplate
- 28" flexible double flue pipe
- Double Vent exhaust cap
- Rubber weather gasket

The Dickinson NEWPORT Propane Direct Vent heaters are lovely little appliances for heating and for a fireplace effect. Ideal for boats up to 28/40 ft (8.5-14.6M). The combustion process is completely isolated from the inside of the boat by the unique, direct vent design. A built-in blower provides good hot air circulation. Thermocouple protection in case of blow-out. These heaters are sold with all accessories including a stainless steel backing plate, double-bell deck cap and 28" (71cm) of flexible, double stainless chimney. Extensions are available in 28" (71cm) and 10" (25.4cm) lengths. Stainless flue guards and cap guards are available. Safe, easy to use and extremely economical. Available in two sizes.

This heater transfers heat from the combustion chamber to the cabin through a blower and heat exchangers inside the unit. The sides of the unit do not get hot but an airspace must be provided to ensure adequate airflow. The appliance is manually lit. Please see owners manual for installation details.
