ACCESSORIES

S5 SHOCK PUMP

The high-pressure shock pump is required for setup and operation of the Shockwave S5 suspension module. It features an integrated pressure gauge and bleed valve for simple adjustment with a maximum inflation pressure of 350 psi.

CORBIN 2 SEAT

The SHOCKWAVE CORBIN seat is designed to add an extra element of comfort and support for our S5 module. Crafted in the U.S., these seats are the definition of quality and strength, made using only the best materials available today. Comes in three colours: Onyx (model shown), Desert and Storm.
