THRUSTERS

STERN PRO

STERN PRO

The other side of the BOW PRO

Looking for a fully proportional stern thruster? VETUS re-introduces a kit to convert a BOW PRO to a STERN PRO! These G.R.P. tunnel kits fit most transoms. Manoeuvring will become child's play, and even the effects of wind and current can be effectively countered. Installation of the stern kit is simple as the actual thruster motor and electric components are fitted internally to the transom of the boat, while the tunnel and propeller are installed externally on the transom. Available in tunnel diameters from 125 mm all the way up to 400 mm, there are even kits available for future BOW PRO thrusters!

Total control for that tight spot in the marina

For the STERN...P kits either original BOW PROs or the BOW PROs with benefits (BOW PRO Boosted) can be used, as both tailpieces are identical. If the openings of the stern thruster are too close to the waterline, we offer an extension kit. These deflector shells cowls will prevent air suction and loss off thrust. The G.R.P. shells mount to the STERN...P kit with stainless steel fasteners and can easily be fitted to existing installations up to 300 mm. All STERN...P kits are available from stock.

Highlights

- Add an stern thruster with the thruster kit even when your space is limited
- Easy to adjust G.R.P. tunnels
- Covers the entire BOW PRO (Boosted) range with 125, 150, 185 and 250 mm tunnel
- Extension kits available for 125, 150, 180, 250 and 300 mm tunnels
